SUBJECT: SYSTEM SUPPORT DIRECTIVES CHECKLIST

Date:
11/12/01

1. **PURPOSE.** This order transmits the list of the System Support Directives (SSD) issued by Operational Support (AOS).

2. **DISTRIBUTION.** This order is distributed to the divisional levels in Airway Facilities and Air Traffic in Washington; to branch level in regional Airway Facilities and Air Traffic; to divisional level in the Logistics Center and the Academy at the Aeronautical Center; to the branch level in ATC Engineering and Test Division and the NAS System Engineering and Analysis Division at the Technical Center; and to all Airway Facilities and Air Traffic field offices with a limited distribution.

3. **BACKGROUND.** In October of 1996, AOS launched an effort to consolidate and standardize the various formats used to deliver technical information, software and hardware modifications (Electronic Equipment Modifications [EEM] , Plant Equipment Modifications [PEM], Site Program Bulletins [SPB], and Site Technical Bulletins [STB]) to the field. This effort resulted in the SSD format, which consists of three document-types:

    a. **System Support Modifications (SSM)** are used to transmit system hardware, software and plant modifications to the field.

    b. **System Documentation Releases (SDR)** are used to deliver Technical Issuance (TI) documents or change pages.

    c. **System Technical Releases (STR)** are used to deliver technical system information that does not require a hardware or software modification.

4. **EXPLANATION.** This order represents a transition from listing technical modifications in the Washington Headquarters Directives Checklist, WA 0000.5, to the System Support Directives Checklist, Order 0000.22, Appendix 1. However, previously issued EEMs and PEMs will still be listed in the latest edition of Order WA0000.5. The SSD List will also be available on the web at http://intranet.aos.faa.gov/aos20/aos20div/qa/

5. **SYSTEM SUPPORT DIRECTIVES FILES.** The SSD documents are listed alphabetically by facility equipment type (DSR, STARS) and are grouped by document type (SDR, SSM, STR). They are in the sequence in which they should be filed.

Distribution. A-W @F/AT)-3; A-X (AF/AT)-3; A-Y (ML/MA)-2;
A-Z (CT-200/500)-2; A-FAF/FAT-0 (LTD)

Initiated by AOS-20

6.   **REFERENCE.** SSD documentation can be cross-referenced with formerly issued EEMs and PEMs, which will continue to be listed in the latest edition of Order WA0000.5, by using the Standard Subject Classification Code, as listed in the latest edition of Order 0000.1, FAA Standard Subject Classification System, located in the center of the heading of the issued SSD. This number refers to the system classification number of the EEM and PEM.

7.   **OFFICE OF PRIMARY RESPONSIBILITY (OPR).** Operational Support (AOS) is the office of primary responsibility (OPR) for the checklist. However, the organization responsible for the individual SSD document is listed on the list under the heading, ORGANIZATION.

8.   **PUBLICATION FREQUENCY.** The SSD checklist will be published semi-annually by the Program Management Division, AOS-20.

Gregg Dvorak
Program Director for Operational
   Support, AOS- 1
